

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

- Redesigned the frontend on the main branch.
- Converted the chatbot interface into a professional ChatGPT/Claude-style UI.
- Added responsive chat layout with sidebar, new chat, conversation list, message area, and chat composer.
- Connected the new frontend structure with the existing CHARUSAT RAG chatbot backend..

-

Reason for incomplete work:

- Authentication and database integration were planned for the next phase.

Plans for next week:

- Integrate MongoDB Atlas for user accounts and persistent chat history.
- Implement email/password authentication.
- Implement Google authentication.
- Add user roles and temporary admin account.
- Add guest-user question limits and authenticated session management.
